

Agility Recovery Solutions Expands Services to Include Online Data Backup

Agility and AmeriVault Partner to Provide Completely Turn-Key, Scalable Recovery Solutions to all Size Operations

December 15, 2003, Atlanta, GA, Toronto, ON and Waltham, MA – Agility Recovery Solutions, the premier provider of on-site client centric business recovery and continuity solutions across the United States and Canada, today announced that they have added online data backup capability to their portfolio of service offerings. The new service, which is the result of a strategic agreement with industry leader and pioneer AmeriVault Corp., synchronizes online data backup, off-site storage and physical recovery equipment to mitigate business interruption due to data loss or disaster.

“As the acceptable window for recovery continues to shrink for businesses, it was imperative to Agility that we provide a solution that would provide our customers with state of the art, cost effective and reliable backup options that would smoothly transition into a recovery plan if the situation warranted,” said Robert Miano, President and CEO of Agility Recovery Solutions. “We often see customers plagued with out of date or corrupted data at the time of disaster – this partnership ensures that their data is available and accurate, speeding up the entire recovery process, and significantly reducing this prevalent problem.”

Anna Frazzetto, VP of Professional Services for Agility adds, “We were impressed by the true scalability of the product, allowing us to offer the same high quality solution to our larger customers, while ensuring our customers in the small and medium size markets, and on multiple platforms, were also adequately covered.”

With Mass Storage Vaults located in the Boston and Philadelphia areas, AmeriVault is well positioned to provide reliable, secure and automated server backup to Agility's customers. "The pairing of Agility's recovery options and our remote backup solution provides for a unique and affordable disaster recovery offering," said Bud Stoddard, President and CEO of AmeriVault Corp. "We can now tailor a disaster recovery solution to match the shrinking recovery time objectives companies are seeking."

This new capability joins Agility's portfolio, which includes comprehensive recovery Consulting services, Mobile Recovery Facilities, Portable Quick-Ship Technology, and Satellite Recovery for Voice functionality. Scott Bird, VP of Sales for Agility Recovery Solutions states, "Agility has always been proud of the true partnership we foster with our customers, to guide them through the entire recovery process. We can now assist them in proactively avoiding data-related disasters, and incorporate data recovery into the overall solution. It's a perfect fit."

Online backup is available to Agility customers immediately. For more information visit www.agilityrecovery.com or call (800) 567-5001.
